

Rijk Zwaan varieties obtained *without* making use of CMS by means of protoplast fusion techniques

Although several crops in which use is made of CMS by means of protoplast fusion techniques are allowed in organic production according to the applicable EU legislation, certain organizations do not wish to make use of protoplast fusion products at all. For the purpose of transparency Rijk Zwaan has specified its varieties in which no use has been made of CMS by means of protoplast fusion techniques in the overview below.
